

Gonzaga with the No.1 AP ranking while Houston has an AP rank of No.15

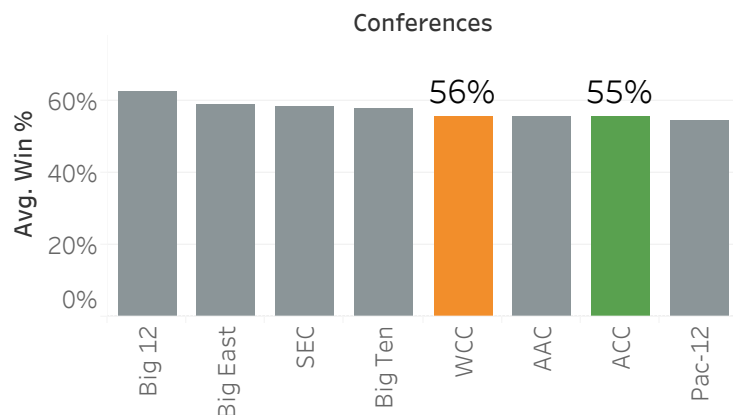

Gonzaga has the **lowest** average **strength of schedule** while Houston has a much **higher** average of schedule

(2021-2022) Top 15 schools' basketball AP rankings

Gonzaga conference has the lowest average win% compared to Houston conference

Houston has a more difficult strength of schedule than Gonzaga because they play games with the best team, which makes them rank 15th in college basketball.

Gonzaga's schedule includes much weaker opponents in comparison to their skill level. Therefore their ranking of No.1 could be seen as inaccurate due to their overall record being inflated with an easy win.

The average win% for a conference does not necessarily tell how good a school or the conference is, because, in a conference, there are usually good and bad team players or schools to even out the percentage.
